BPMN Assignment

1) [5 pts] From the model in Assignment 4 create a BPMN Diagram depicting the details of the Sub-process "Process request".

   a) Use this tutorial to guide you through the basics:
      http://eclipse.org/bpmn2-modeler/videos/BPMN2Modeler-SimpleProcess.htm
   b) Create a new BPMN diagram called "Take Out Insurance Processing".
      i) Build the Process shown below.

2) [15 pts] The insurance company is not given a choice here?
   a) Copy the above diagram into a new diagram, and add the following choice.
   b) The insurance company should be able to decline the request after evaluating the home. Add a gateway to allow Take Out Insurance to reject a request after evaluation.

3) [30 pts] The current process can only handle home insurance requests; Take Out Insurance offers home, boat and auto insurance plans.
   a) Copy Part 2 into a third diagram.
   b) Add separate Process branches to handle the other two Types of Insurance.
      i) The customer will send a single (combined) request.
      ii) Only the type(s) of insurance that are requested should be processed.
